

# MEGA MAIKER

THE COMUNITY OF MARKET MAKERS

# **Welcome to MEGA MAKER**

**A Decentralized Autonomous  
Organization (DAO) supported by  
the MakerX governance token.**

**Discover a deflationary, innovative, and disruptive program that multiplies digital assets.**

With rewards, commissions, and participations, everything is powered by web 3.0 technology and blockchain, and securely managed by Smart Contracts.

# The MMPRO

Mega Maker Program was designed, drawn, and programmed with the goal of protecting, shielding, and enhancing the MakerX asset.

It features a powerful and disruptive collaborative and deflationary mechanism, governed by Smart Contracts.

# Foundations of the Mega Maker Program

- Community of Market Makers
- Inflationary Control
- Autonomy and Decentralization
- Scalability and Sustainability
- Multiplication and Appreciation of the Asset
- Incentive to Collaboration

# Why Collaborative?

MMPRO is collaborative because it encourages a growing community of Makers to collaborate in the expansion and scalability of the asset, through rewards, commissions, and participation.

# The collaborative mechanism of the Mega<sup>10</sup> Maker Program includes:

## Rewards Pool

3x your contribution reward

## Referral Program

20% Commission in the Affiliate Program

## Global Pool

Participation in the Global Contribution

# Reward Pool

Special Reward for  
Contributing:

# 3x

THE VALUE OF YOUR  
CONTRIBUTION

A large, 3D, metallic green '3x' logo is centered on the right side of the image. The background features a dark space with a grid of small blue dots and several bright green beams of light. A prominent green arrow points upwards from the bottom center, passing through the '3x' logo. The overall aesthetic is futuristic and high-tech.

Upon connecting your wallet and making a contribution, that wallet is linked to a smart contract. **This contract begins to generate a reward of 3x the value of your contribution, fractionated at each mined block (2 seconds), and distributed over 20 months.**

Your reward can be claimed at any time, without human interaction, directly in your wallet. **All with simple clicks, autonomously and automatically.**

# Referral Program

Participation in MMPRO is only possible through an invitation via an affiliate link.

Comission		
1°	8%	
2°	4%	
3°	2%	
4°	1%	
5°	1%	
6°	1%	
7°	1%	
8°	1%	
9°	0.5%	
10°	0.5%	

Referral Comission

# How It Works:

**Activation:** Upon making your first contribution, the system automatically activates your affiliate link.

**Invitation:** Invite others and receive 20% in commissions on their contributions; distributed across 10 depth levels.

**Direct Payment:** Commissions are deposited directly into your wallet at the time of your referral's contribution, via smart contract.

# Benefits:

- ➔ **Decide how much you want to earn, helping others triple their assets.**
- ➔ **Immediate payment directly into your wallet.**
- ➔ **No fees or intermediaries.**
- ➔ **No bureaucracy or complex rules.**
- ➔ **Money immediately available.**

# Imagine:

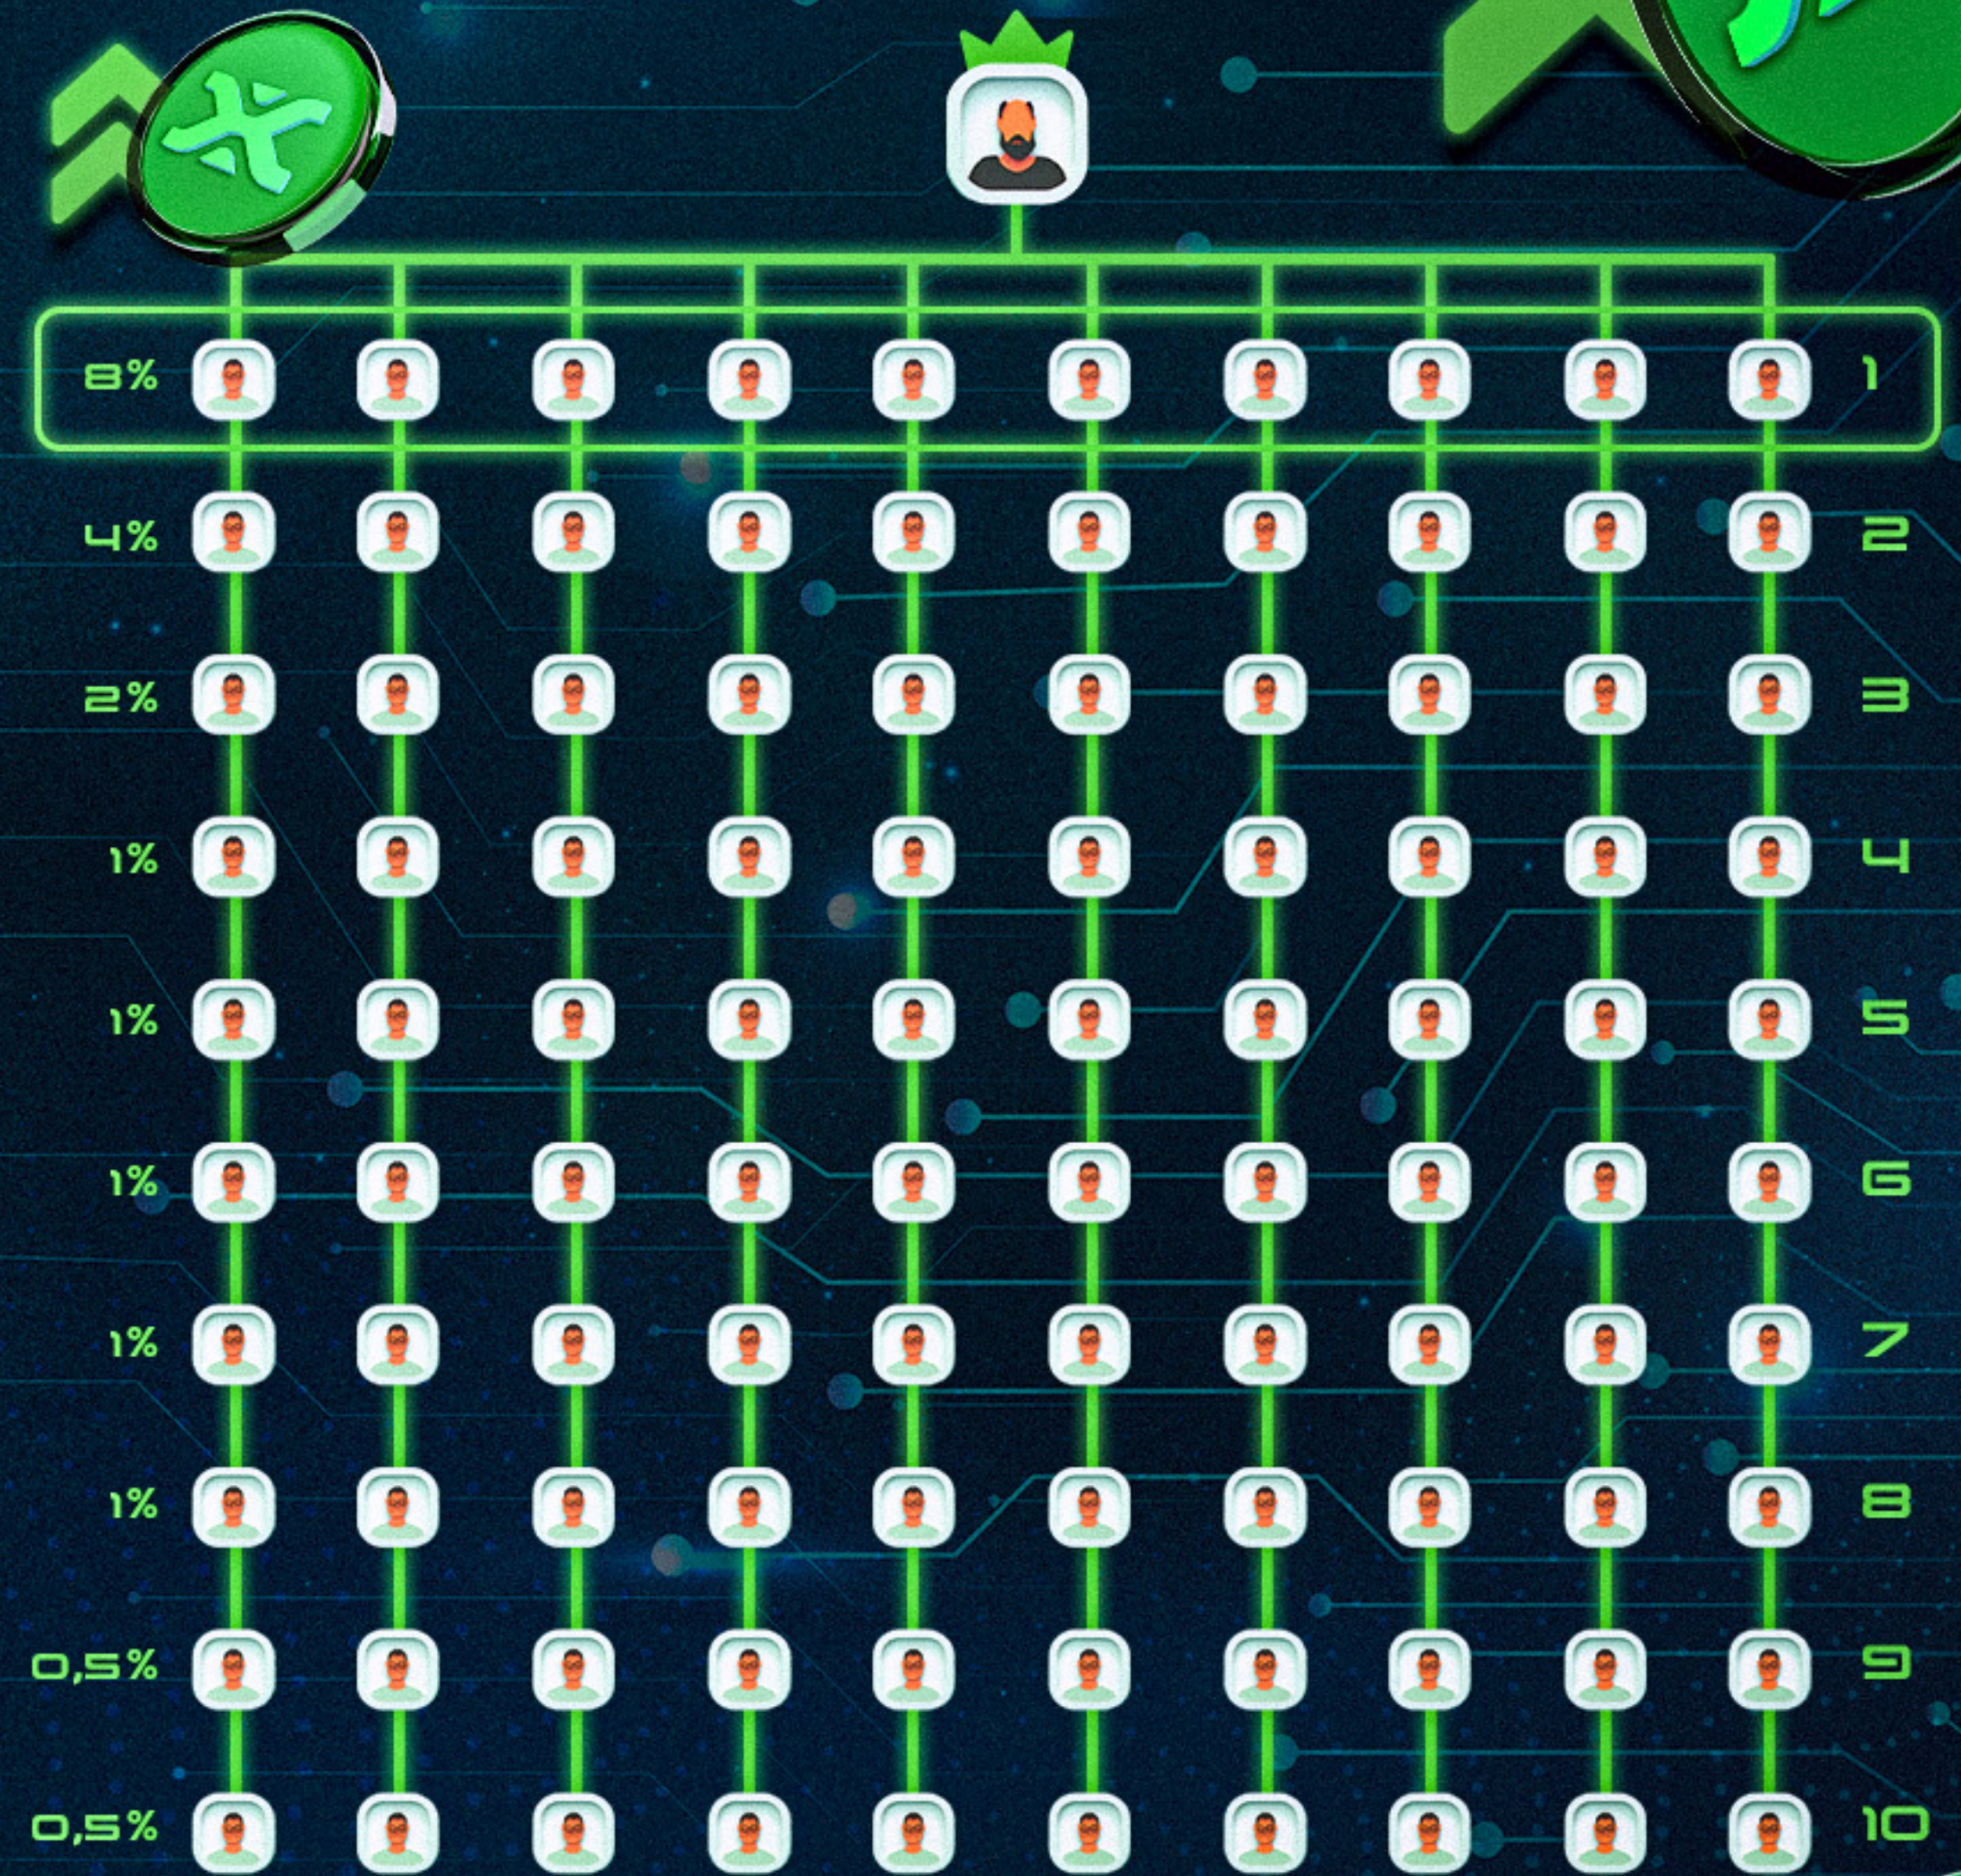

A projection across 10 levels of Makers contributing actively and progressively.

Referring 10 people and they investing \$1000 each and bringing 10 more people with the same investment, you have an immediate return of:

**1900** 

Medium-term token price projection at \$20

**38,000\$**

# Global Pool

Participate in the extra prize of 5% of all global contributions, shared among the program's top contributors.

# How It Works:

**Distribution:** 5% of all global contributions are distributed according to your ranking in the Global Pool.

**CLAIM:** These amounts can be claimed in MakerX at any time, directly into your wallet, autonomously and automatically.

**Ranking:** All participants are ranked according to the value of their contribution.

# Participation in the Ranking:

You participate from the 1st to the 10,000th place in the ranking.

Participation is weighted with different values, benefiting the Top Makers.

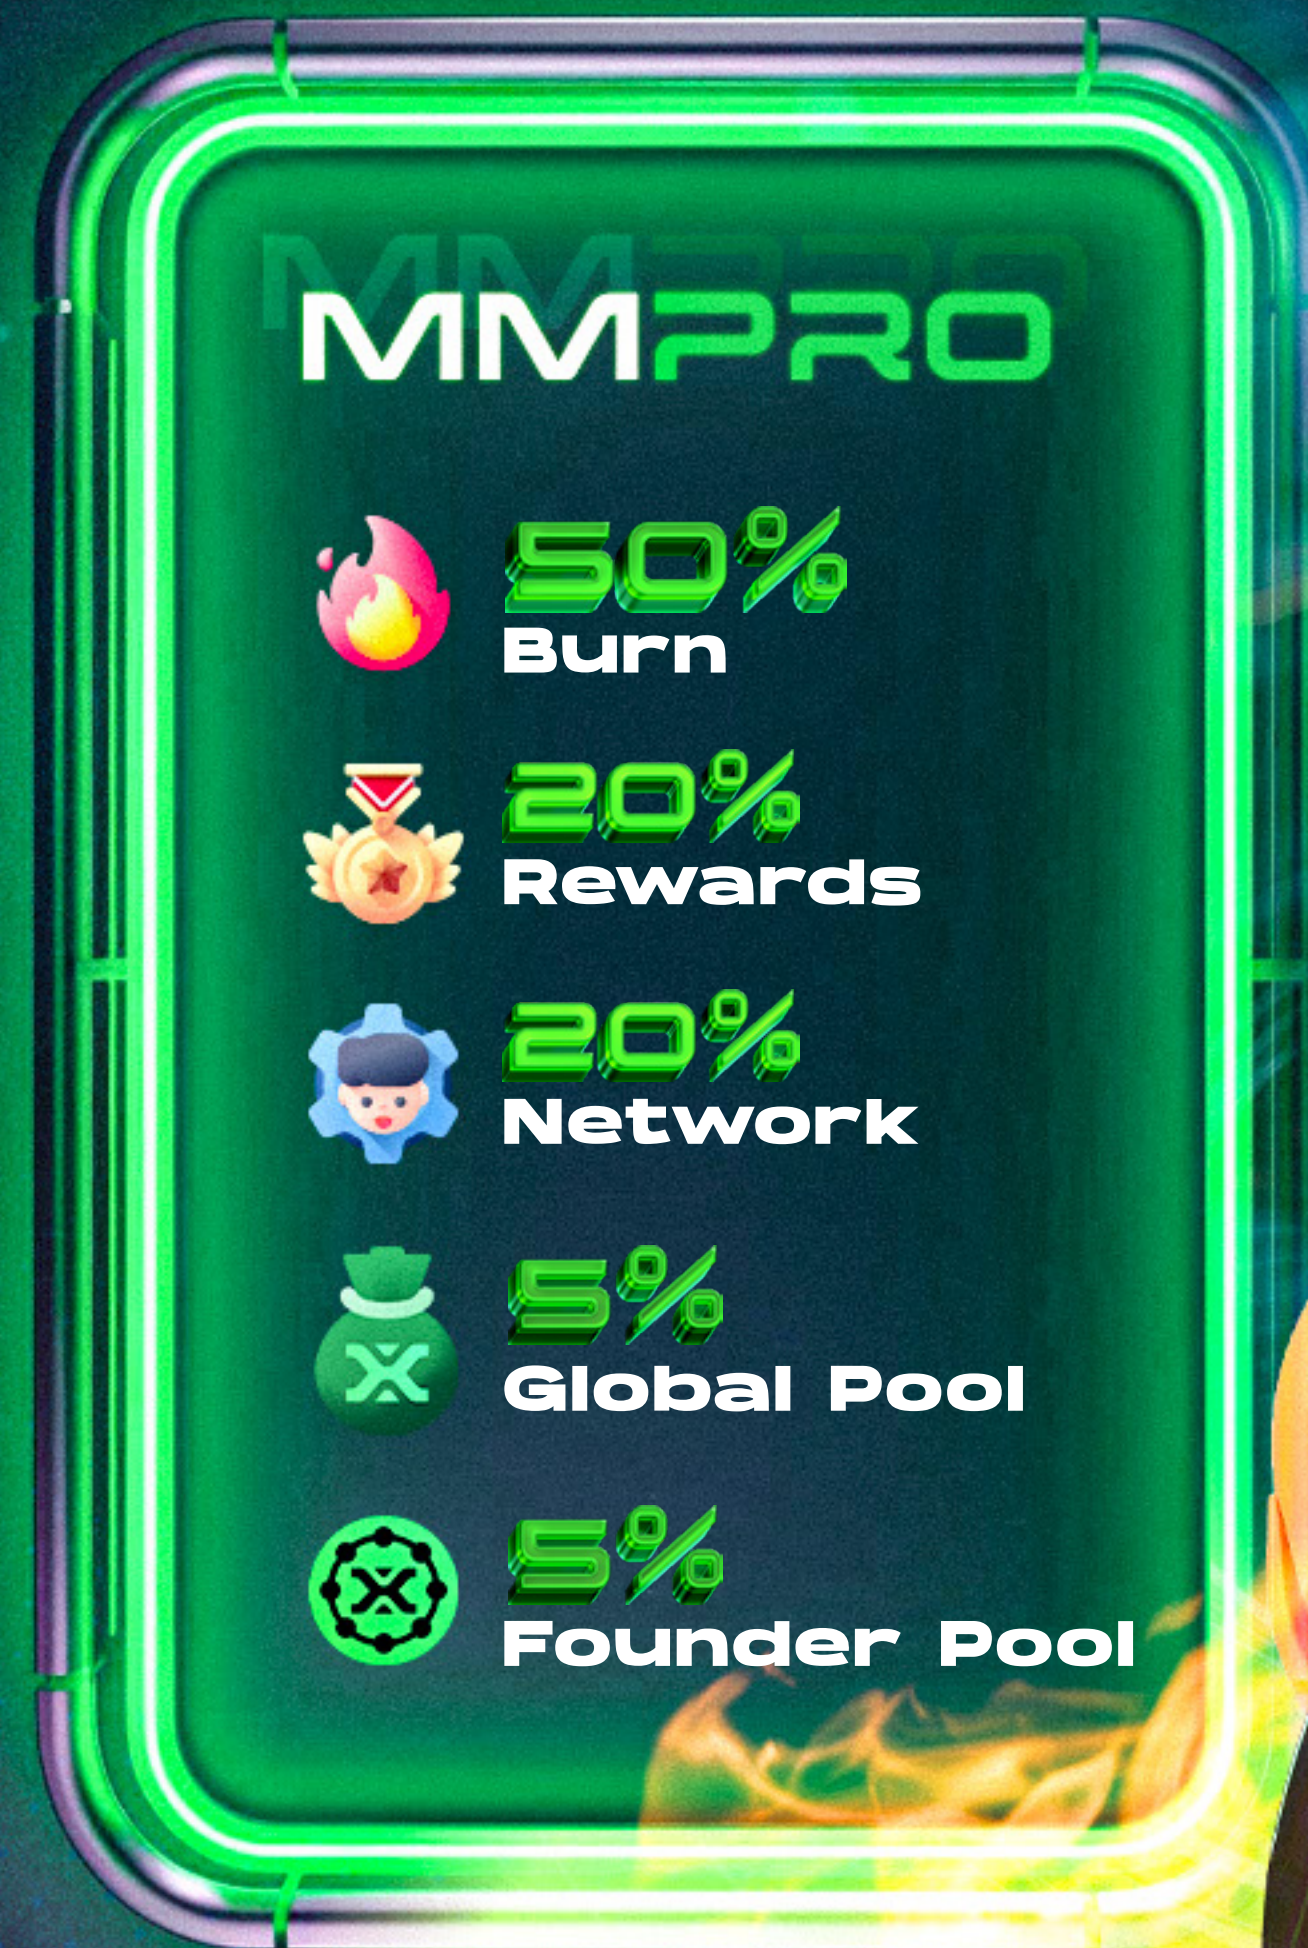

# Benefits:

- ➔ **Contribute to the program and become one of the top contributors.**
- ➔ **Claim your share of the 5% of all global contributions.**
- ➔ **Enjoy exclusive benefits for the main participants.**

# Deflationary Mechanism

The architecture of the Mega Maker program was designed to make MakerX a deflationary asset with high potential for appreciation and scalability.

# Upon Contribution:

70% of Contributed Tokens are removed from circulation.

50% immediately burned (BURN).

20% sent to the REWARDS POOL, feeding back into the system.

30% of the balance are distributed in the affiliate program and in the Global and Founder Pools.

 50%

 30%

 20%

# Impact on Supply and Demand:

The removal of tokens from circulation decreases the supply, and in a scenario of constant demand driven by the MMPRO program, it can substantially contribute to the token's appreciation.

In addition to the above distribution, the smart contract is programmed to control token inflation through a halving system that will adjust the issuance of rewards in the future. It also implements automatic liquidity scalability mechanisms to prevent and control deliberate actions by whales. To delve deeper and learn more about these technical aspects, join us in our immersions and classes on our official communication channels, where you can interact and learn from more experienced Makers.

# Founder Pool

## Extra Reward for Co-Founders with Founder Token

An extra reward of 5% of all global contributions is reserved for the co-founders of the program, holders of the Founder Token.

**5% of all global contributions are distributed here and can be claimed in MakerX directly to your wallet, autonomously and automatically.**

# Proportional Participation:

Founder Token holders are positioned in the Founder Pool in proportion to the burned amount of Founder Token within the Mega Maker Program.

# Order Book:

In addition to the possibility of performing a Burn, Founder Token holders can create public offers and sell their Founder tokens, receiving USDT directly in their wallets.

# Acquisition by Non-Co- Founders:

A user who is not a co-founder can only acquire a Founder Token if they purchase it from the order book offered by a co-founder.

**4 good reasons not to miss out on the Mega Maker Program**

# Triple Your Tokens Now!

Contribute 1 MakerX token and  
receive 3 as a reward. A unique  
opportunity that awaits you.  
Don't miss out!

Contribute 1,000 and receive 3,000

# Join the Cryptocurrency Revolution:

Be a part of a growing and exciting  
community, exploring and shaping the  
future of the blockchain world.

Come with us!

# Receive Your Rewards Instantly:

With every mined block, your rewards start to arrive. Claim them directly in your wallet via web3.0.

The reward is instant, and the experience rewarding.

# Take Advantage of MakerX Token's Appreciation Potential:

With a deflationary mechanism in place, MakerX has great potential for appreciation. Contribute today and watch your assets grow!

# To Participate, Request Your Invitation Link Now!

Speak with the Maker who introduced you  
to this proposal and start tripling your  
MakerX today.
